THE PREZ SEZ.....

Hello once again from the scrambled keyboard of your prez. Or maybe it's the scrambled brain of yours truly. Hard to tell. Anyway, on to bigger and better things.

Flea Market/Hamfest preparations are continuing. The date has been set for September 27 and 28, and F.M. Chairperson Lil Marvin, NL7DL, bless her heart, has been busy as the bees she keeps getting everything organized. She still has slots open for some pretty important positions, so if you can help out, give her a call at 277-6741 before she calls you. Mary Lewis, W7QGP, ARRL Northwest Division Director, has informed us that she will not be able to attend this year due to other commitments and scheduling conflicts. She had planned on being here the first part of September, and we changed the date of the September general meeting to the 12th so that she could attend, but due to the fact that the ARRL National Convention is being held in San Diego on September 6th and 7th, she had to cancel the trip altogether. We'll try for next year.

The location for the Flea Market/Hamfest is not yet firm, so stay tuned for updates on that subject. Also, for the first time ever, we have invited the CP/M Computer User's Group, GUIDE, to join us, so there should be lots of goodies in the computer field that can be adapted to Ham Radio available at bargain basement prices.

Coming up on September 6th is the rejuvenated Arts Fair. Ed Tucker, KL7DU, has graciously, with a little arm-twisting, consented to be the chairman for this. If you want to have an enjoyable morning or afternoon wandering around looking for lost parents, give Ed a call. The date is September 6, and it runs from 9 AM to 6 PM.

It's official, folks! Jim Larsen, AL7FS, has been put in charge of communications for Iditarod. He will be working with Steve Wilcox, KL7JIM, on voice communications, and Ken Slauson, WB7SFO, on digital communications. Looks like they are planning on doing some packeteering, so get those TNC's ordered so we can get a good digipeater network started.

Speaking of packet, it would be nice if we got more people involved in it here in Southcentral. The cost is minimal, and it has the potential to provide reliable high speed communications along the Parks Highway to Fairbanks and back down the other way through Glennallen, over to Tok, down the Kenai peninsula, and wherever else we can find a path for VHF or HF.

I guess I've rambled long enough. Got to get this to Harvey, NL7DK, so he can get the newsletter ready for the printer. Harvey, by the way, is now a general-in-waiting, having upgraded to that license class recently. Congratulations to him and the others who have successfully made it through a KL7AA testing session.

See you on September 12 at the general meeting. Might have an interesting speaker there for the program. Show up and find out.

73,

Lance

#### NEWS ITEM

#### TRAVELING TO CANADA???

IF YOU ARE TRAVELING TO AND THROUGH CANADA YOU MUST HAVE YOUR ORIGINAL HAM LICENSE WITH YOU IN ORDER TO OPERATE. IF YOU HAVE PROBLEMS ASK A CUSTOMS OFFICER TO REFER TO MEMORANDUM D2-1-1 OR D19-4-2. THESE WILL REMIND THE OFFICER THAT YOUR LICENSE IS VALID AND THAT YOUR EQUIPMENT IS ENTERING CANADA AS PERSONAL LUGGAGE. YOU AUTOMATICALLY HAVE RECIPROCAL AMATEUR RADIO PRIVILEGES IN CANADA.

TAKEN FROM RADIO WORLD

## GENERAL MEETING

The August general meeting was called to order Friday, August 1, at 7:20 P.M. ADT by the omnipotent El Presidente, Lance Dunbar, AL7BK. Introductions promptly followed.

A letter from the ARRL Section Manager, Jim Moody, NL7C, was read by Lance stating that Mary Lewis, W7QGP, ARRL Northwestern Division Director, will be here September 10-18th. A motion was made by Cathi Moody, KL7NR, and seconded by Dan Robison, AL7GN, that the September general meeting be moved to the second Friday in September, the 12th, to accommodate her visit. Also in the letter was the fact that the family of the late Erv and Karen Hobbs have requested that donations be given to the Iditarod Trail Committee in memory of them.

It was noted that in last month's thanks for help with the Pennsylvania mountain climbers J. J. (NL7A) Jones' name was overlooked. Thanks for all your hours of monitoring and phone patching, J. J. Another unsung hero of the ham community.

The annual AAC Arts Fair is on again but greatly reduced in size. The previous booth participants are footing the bill for this year's fair since the college cannot afford to pay for it. Our assistance has once again been requested to provide communications for the event. It's rumored that the trusty Steve Wilcox, KL7JIM, is going to be the chairman. THANKS, STEVE! The fair itself will be on September 6 from 9:00 A.M. to 6:00 P.M. A sign-up sheet was passed; and those of you who missed it can volunteer by contacting Steve.

Chuck Grazioli from the Alaska Academy of Sciences gave a brief talk on the opening of Alaska's first and only Science and Technology Center in the Bayshore Mall during the month of August.

Lil Marvin, NL7DL, then gave a Flea Market briefing. Volunteers (?) were sought for the various support committees needed. Chairmen are:

Booth Chairman - Cathi Moody (KL7NR)

Set-up & Take-down -

Advertising Chairman - Chris Hanson (NL7FX)

Tweak & Peak Chairman - George Hurd (KV9D)

Tables-Acquisition Chairman -

In-House Gambling Chairman - David Epstein (KL7LO)

Fred Tolliver (KL7HM)

Security Chairman - Steve Wilcox (KL7JIM)

Door Ticket Person - Dan Robison (AL7GN)

Flea Market Banquet Chairman - Lyle Reiff, NL7GE

Please contact Lil if you can help with any of the vacancies.

Before returning to her seat, Lil had the honor of presenting the Motley Group Red Lantern Award to the beloved Harley and Arlene Steward (KL7IZZ & KL7HD). Don't hit your head too often, Harley.

The break was followed by Dan (AL7GN) Robison's absolutely fascinating slide show and tell from his two weeks in China last year. From what we understand, there may be another trip October 1987 for approximately \$3500. If you're interested, talk to Dan.

After the door prizes drawing, the meeting was adjourned at 10:07 P.M. ADT.

Respectively submitted,

*Cathi Moody*

Cathi Moody, KL7NR

### YL POINT OF VIEW

What!! Snow on Pioneer Peak. Can Lazy Mountain be far behind? Just thought I'd throw that in. C'mon ladies, Jim Larsen, AL7FS, is taking names for Checkpoints on the Sr. Iditarod. Just think of yourself out there under the Great Alaskan sky at some out of the way Checkpoint. What a challenge, what an experience, what an outhouse, what outhouse!! How about in town or at headquarters. There are also 2 meter checkpoints in town and near town.

We need volunteers for Field Day. How are we doing on upgrading. Be consistant in practicing code. I didn't go to the last PARKA meeting, but I understand that Lynn-KL7IO demonstrated making and putting up a long wire for her radio. Three cheers for the long wire!!! I really appreciate the Technical meetings.

I participated in my first "bunny hunt" at the Motley Group Picnic. I used my handheld and it was a lot of fun. I did a lot of running around, but that's because the "bunny" never told the truth. This sounds like a real good event for the PARKAS.

73's Sharon-KL7VL

Next PARKA meeting is in Palmer at Sharon-KL7VL's QTH. It is kitty-corner from the Palmer Jr. High. Best thing is to get a carpool/caravan or whatever. My work no. is 271-5766, QTH 745-4352 for directions. September 20 at 10:00 am. Talk in Freq. is 146.25/85.

### NOVICE CLASSES

### NOVICE CLASSES

Call Lil NL7DL 277-6741 for any information pertaining to obtaining a Novice Class license.

### HANDI HAMS

### HANDI HAMS

Handiham information for the handicapped, both young and old who may be interested in becoming Amateur Radio Operators. Call Sharon KL7VL 271-5766 work 745-4352 home or Lil NL7DL 277-6741.

The TAPR TNC is a remarkable piece of equipment - and a truly elegant hardware/software design. We'll spend some time describing some of the details of this TNC. Much of this material is directly from the excellent manual which accompanied the beta test boards - and which is available from TAPR for \$15 (PO Box 22888, Tucson, AZ 85734).

The TAPR TNC is the result of a tremendous design effort by many people including Mark Baker, Marc Chamberlain W4PFXM, Pete Eaton WB9FLW, Chuck Green NOAD1, Dave Henderson KD4NL, Lyle Johnson W4GXD, Dave McClain N7AIG, Dan Morrison K4ZB, Margaret Morrison K4ZD, and Harold Price NK6K, along with Den Connors.

Very few terminals or home computers contain the hardware and software necessary to attach to, and control, an amateur radio. Compatibility between such systems could obviously be a problem. Because of this, extensive testing and use of packet radio without some additional tool would be very difficult, if not impossible.

The TNC is that tool. It is connected between your terminal (or computer) and your amateur radio. Just what is it that the TAPR TNC provides? Between the interfaces to your terminal or computer and your radio is a complete microcomputer with memory and input/output devices. This microcomputer with appropriate software is used to implement the packet radio protocols. Thus any computer can be interfaced to any other computer via amateur radio using the TNC.

The TAPR TNC connects to an RS-232-C interface, found on most terminals and home computers. A parallel interface is also provided, although not supported for terminal interfacing in the initial software release. The necessary connections exist to interface the TNC to your amateur radio equipment. These connections include lines to your external speaker (or earphone) jack and the microphone jack (both for microphone audio and for push-to-talk control).

Also included is a complete modem used to convert the digital information coming from the computer or terminal into an analog signal (a set of audio tones) which your radio can transmit. It also performs the reverse function, converting analog signals from your receiver to digital data. Because of the bandpass characteristics of many amateur radios, an active audio filter is also included in the TNC. Passive filters proved inadequate to support transmission rates of 1200 baud - a design objective.

Power for the electronics on the board required four different voltages: +5, -5, +12, and -12 volts. The TNC includes on board power supplies for these voltages and uses a custom wound power transformer designed specifically for TAPR and included with the board.

But hardware is only part of the TNC. Software is equally (if not more) important, for it's the software which makes this hardware useful in handling packet radio protocols.

(To be continued) Courtesy of K1XAT

Young  
346-2449

I GOT TO TALKING WITH A FEW HAMS GATHERED TOGETHER ON WHAT APPEARS TO BE THE BEGGING OF A RAINY DAY AT DARREL'S (AL7HU) QTH TO INSTALL A TRI-EX 80FT. TOWER. HE GATHERED ABOUT A DOZEN OF US TO CARRY IT FROM THE FRONT YARD TO THE BACK. THE INSTALLATION WAS A BREEZE. DARREL IS STILL CONTEMPLATING WHAT TO PUT ON IT. HE'S HEARD A LOT ABOUT QUADS VS YAGIES. HOW ABOUT A LITTLE FEEDBACK? ANYONE GOT ANY PRO'S OR CON'S ?

MY DISCUSSION IS A SUBJECT THAT AROSE DURING MY VISIT TO DARRELS'. WE STARTED TALKING ABOUT INSTALLING PL-259'S ON RF CABLES. I LIKE TO USE RG-213 OR RG-214 FOR MOST OF MY ANTENNA WORK BECAUSE OF THE LOWER LOSS AND BETTER RF SHIELDING. THE CONSEQUENCE OF BETTER SHIELDING IS USUALLY DIFFICULT INSTALLATIONS OF CONNECTORS BUT WITH A LITTLE PREPERATION OF COAX AND CONNECTOR I'LL SHOW YOU AN EASY WAY.

LET'S START BY STRIPPING OFF ABOUT 4IN. OF PLASTIC COATING FROM THE COAX. GOT YOUR SOLDERING GUN READY? LOOSEN, RETIGHTEN AND WIRE BRUSH THE SOLDERING TIP FOR MAXIMUM HEAT TRANSFER. COAT THE COAX WITH FLUX ON THE 3 TO 4IN MARK. FILL THIS WITH SOLDER AND HEAT IT ENOUGH TO LET THE SOLDER BE WELL SOAKED INTO THE COAX WITHOUT LEAVING LUMPS OF SOLDER. WAIT FOR IT TO COOL BEFORE PROCEEDING. I FOUND OUT ABOUT THAT THE HARD WAY (SMILE). CUT THRU THE TOP QUARTER OF THE TENTED INCH, LEAVING 3/4 IN. OF TINTED SHIELDING. MAKE SURE YOU LEAVE ENOUGH OF THE CENTER CONDUCTOR TO FIT INTO THE PL259. NOW INSERT THE TENTED COAX INTO THE PL259. IF IT DON'T FIT, THEN TAKE A SMALL FILE AND TAKE OFF EXCESS SOLDER TILL IT FITS. THERE SHOULD BE NO DAMAGE TO THE BRAID. YOU DON'T WANT FILED THRU PIECES OF BRAID LOOSE WHEN ITS RESOLDERED.

TAKE A FILE TO THE AREA OF THE CONNECTOR THAT HAS THE FOUR SOLDER HOLES. TAKE OFF A LITTLE OF THE SILVER COATING TO EXPOSE COPPER. APPLY SOLDER AND FLUX. APPLY HEAT TILL THE SOLDER COATS THE ENTIRE AREA. PICK UP THE CONNECTOR (WITH NEEDLE NOSE PLIERS - NOT FINGERS) AND KNOCK OFF THE EXCESS SOLDER WHILE ITS REAL HOT. LET THE CONNECTOR COOL, WIPE OFF ALL EXCESS FLUX. FLUX LEFT ALONE WILL EAT YOUR CONNECTOR. KEEP IT CLEAN. INSERT THE COAX INTO THE CONNECTOR, APPLY HEAT AND A DAB OF SOLDER. DON'T SOLDER THE CENTER CONDUCTOR YET. YOU CAN STILL REMOVE THE CONNECTOR WITHOUT DAMAGE IF ITS SHORTED (BRAID TO CENTER CONDUCTOR). MEASURE RESISTANCE BETWEEN SHIELD AND CENTER CONDUCTOR. IT SHOULD BE AN OPEN. IF IT IS SHORTED, YOU CAN REMOVE THE CONNECTOR, CLEAN IT INTERNALLY AND START OVER. WITH A OPEN READING THEN SOLDER THE CENTER CONDUCTOR AND RETEST. AGAIN, CLEAN OFF ALL EXCESS FLUX. THE CONNECTOR SHOULD BE READY FOR USE. WHEN I ATTACH THE CONNECTOR, IF ITS OUTDOORS AS ONTO THE ANTENNA, I LIKE TO SEAL THE CONNECTION WITH SELF SEALING TAPE (NOT ELECTRICIANS TAPE). THE JOB SHOULD LAST YOU FOR A VERY LONG TIME. ENJOY.

GOD BLESS  
RUSS KL7EM

### The Flight of JAS-1

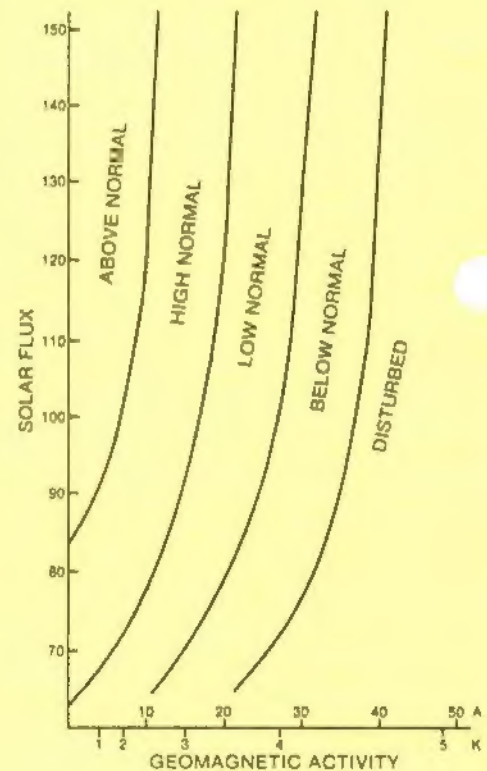

The Japanese Amateur Satellite is now in orbit although not yet open for two-way communications. It is requested that listeners Listen only until the operating schedules are announced. Output is on 435.9 to 435.8 MHz (inverted sideband).

Taken from QEX

## Do-It-Yourself Propagation Forecastin

The solar flux and A-index data broadcast by WWV a. 18 minutes after the hour can be used to determine ionospheric propagation conditions.

With few exceptions, high solar flux values and low levels of geomagnetic activity are associated with good ionospheric propagation conditions. Conversely, low solar flux values and high levels of geomagnetic activity are associated with poor conditions. The relationship between solar flux, geomagnetic activity indices, and categories of high frequency propagation conditions is shown in the chart below. Thus, if a WWV broadcast at 18 minutes after the hour reports a solar flux of 80 and a current K-index of 2, conditions would be categorized as HIGH NORMAL, and it might prove worthwhile to get on the air. If, on the other hand, the solar flux is reported as 74, and the current K-index is 5, you can expect generally poor conditions.

INFORMATION SOURCE: Jacobs, G., and Cohen, T., "A Breakthrough in Simplifying Ionospheric Propagation Forecasts," CQ, March 1975.
